03:55:00 GMT FROGS ANATOMY AND
PHYSIOLOGY -

ecolinc.vic.edu.au - The
body structure, or anatomy,
of the frog is very similar to
the anatomy of a human.
Both humans and the frog
have the same kinds of
organs and systems of
organs. The frog's anatomy,
however, is much simpler.

1) General Body Features
As in other higher
vertebrates, the frog body
may be divided into a head,
a short neck, and a trunk.

ANATOMY OF THE
FROG DUE TUESDAY,
JUNE 5TH!!!! - A male
frog is distinguished from a
female frog by the presence
of vocal sacs and a
copulatory pad on
forelimbs. A female frog
lacks these body features. A
female frog lacks these
body features. Anatomy
